

Public Opening of Science Fiction Science Future

Opening Day Activities
(10 a.m. — 2 p. m.)
// Museum-wide Scavenger Hunt
// Coding Unplugged! Learn the tricks behind computer programming through a series of games.

On Saturday, February 10, MOSH invites you to explore the future of tomorrow in our newest traveling exhibition, Science Fiction Science Future.

Let your imagination run wild with a vision of the future you thought only existed in fiction. If you thought teleportation, holograms, invisibility and mind control were only in the movies – think again. The exhibition will allow you to move objects with your mind, turn invisible right before your eyes, be mimicked by a life-like robot and see augmented reality in action.
